## **DETAILED ACTION**

The Examiner of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Examiner Haghighatian.

## Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 04/07/08 has been entered.

Receipt is acknowledged of the Amendments and Remarks filed on 04/07/08.

Claims 1, 19 and 20 have been amended while no claims have been cancelled or newly added. Accordingly, claims 1-22 remain pending.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/393,168 Page 3

Art Unit: 1616

The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanner et al (5,569,466) in view of Miskel et al (3,851,051).

Tanner et al teach fill compositions for soft gel capsules comprising an active agent dissolved or suspended in a carrier liquid (see abstract). Example 2 discloses a process of preparing a suspension wherein the liquid mixture is homogenized using high shear mixing techniques (see col. 4, lines 63-67). Examples 1, 2, 5, 6 and 8 disclose a fill composition comprising active agents and maltitol syrup (or lycasin) (a polysaccharide). No dispersion stabilizers, oil or fats are included. Examples 4 and 7 disclose fill compositions comprising active agents, maltitol syrup and peppermint oil. No dispersion stabilizers included. Tanner et al teach fill formulations comprising a polysaccharide such as lycasin, however does not specifically teach adding a dietary fiber.

Miskel et al teach a soft capsule comprising a water-soluble dietary fiber (citrus pectin) and a material of limited oil solubility (diphenhydramine) (see Example 1).

Art Unit: 1616

Further, Miksel et al teach a soft capsule comprising a water-soluble dietary fiber (apple pectin), a material of limited oil soubility (glycerin) and a fat and oil material or oil soluble material (vitamin E) (see Example 50). In Example 43, Miskel et al teach a soft capsule comprising a water-soluble dietary fiber (citrus pectin) and a material of limited oil solubility (sodium saccharine). No dispersion stabilizer and fat and oil material or oil soluble material is present. High stability is disclosed (column 1, line 18-25).

Miksel et al provide a **stable soft gelatin capsule** having a water containing solution or **suspension** of an active ingredient **in the fill** (see col. 3, lines 41-44).

Miskel et al provide a soft gelatin capsule having a fill containing as high as a15-20% water solution of an active ingredient, yet which has a long life and does not exhibit the problems of softening, deterioration, or attack by substances normally deleterious to the gelatin shell (see col. 3, lines 53-58).

It would have been obvious to one of ordinary skill in the art at the time the invention was made given the soft capsule formulations of Tanner et al, to have looked in the art for other ingredients such as water-soluble dietary fibers for the fill composition, as disclosed in Miskel et al with a reasonable expectation of successfully preparing a stable homogenized fill composition for soft capsules. In other words, all the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, and the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

## Response to Arguments

Applicant's arguments with respect to claims 1-22 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINA HAGHIGHATIAN whose telephone number is (571)272-0615. The examiner can normally be reached on core office hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
